Problem Statement Format

We Developed a Desktop Application in last semester.We develop Poultry Management system in which at last we face duplication of data.

Element	Description
The Problem of	Duplication of Data in Tables.
Affects	Customers, Whole Saler, customer service, employees, Finance, stock, suppliers, Investors, Owner, Manager
Result in	Customer dissatisfaction, decreased profitability, Inconsistency in data, false values in stock, sale decreased, Lack of employee salaries, No Promotion and disrespect-fullness in Market.
Benefits	- In the desktop Application, check all the constraints and errors so that the data redundancy will be reduced. - Improve Data Entry points in the Desktop Application. - Increase accuracy of data. - Consistency of data. - Higher Profitability. - Respect in Market. - Employee Promotions.
